

Flavor Physics

Dr. Brendan Casey

Fermi National Accelerator Laboratory, USA

Program

- day 1: History of flavor physics
- day 2: Quarks (including baryogenesis)
- day 3: Leptons (including leptogenesis)
- day 4: Searching for new physics
- day 5: Student presentations

In the last day session (november 8th) students will make each a presentation (5 minutes) on some topic about flavor physics of their choice or something they are already working on.

Departamento de Física del Cinvestav, Mexico, D. F. del 4 al 8 de noviembre de 2013.
